SUMMARY

Fresh Industrial Design graduate with a strong interest in product design, UI/UX, and user-centered experiences. Passionate about understanding user needs and turning them into functional, intuitive, and meaningful design solutions. A creative and adaptable designer with strong problem-solving and collaboration skills, eager to contribute to innovative projects and grow professionally.

EDUCATION

Bachelor of Industrial Design **Oct 2021 - Jul 2026**

Faculty of Applied Arts, Damietta University

- Ranked 3rd in graduating class | GPA: 3.49/4.00
- Graduated: 2026
- Graduation Project: High Distinction

GRADUATION PROJECTS

- **KHEPRA – Smart Heritage Vehicle**

- Sustainable Mobility | Industrial Design

A smart and sustainable vehicle designed for transportation within heritage and archaeological sites, inspired by Egyptian cultural heritage and developed to provide a functional and user-friendly mobility experience.

- **ELVANO – Vertical Smart Bakery System**

- Product & System Design | Industrial Design

A vertical smart bakery system designed to organize and optimize the baking process within a compact space, integrating multiple functional stages into an efficient and user-friendly product system.

Graduation Projects: High Distinction

SELECTED PROJECTS

- **Glass Waste Recycling Facility**

An industrial design concept for a glass waste recycling facility, focusing on efficient waste processing, sustainable production, and reducing the environmental impact of industrial waste..

- **Workspace Service Design & User Experience**

Designed a user-centered coworking workspace service by analyzing diverse user needs, behaviors, and pain points. Developed personas, user journeys, touchpoint maps, and participatory workshops to identify opportunities and propose practical improvements to the overall workspace experience.

- **Multi-Functional Adaptive Table**

A user-centered table designed with adjustable configurations to adapt to different users, activities, and usage scenarios, providing flexibility and multifunctionality.

ADDITIONAL INFORMATION

- **Software:** SolidWorks, AutoCAD, Blender, Figma, Adobe XD, Microsoft Office
- **Technical Skills:** Product Design & Development, Design Research, Concept Development, Design Thinking, User-Centered Design, Ergonomics & Human Factors, Form Development, 3D Modeling, Prototyping, Material Selection, Manufacturing Processes, Sustainable Design
- **Soft Skills:** Team Collaboration, Problem-Solving, Critical Thinking, Creativity, Attention to Detail, Research & Analytical Thinking, Presentation Skills, Fast learner, UX Problem Solving
- **Languages:** Arabic — Native, English — Good
